

DISPLAY ACCESSORIES LITERATURE RACK

Screw in the top support bracket to hold upright poles in place.

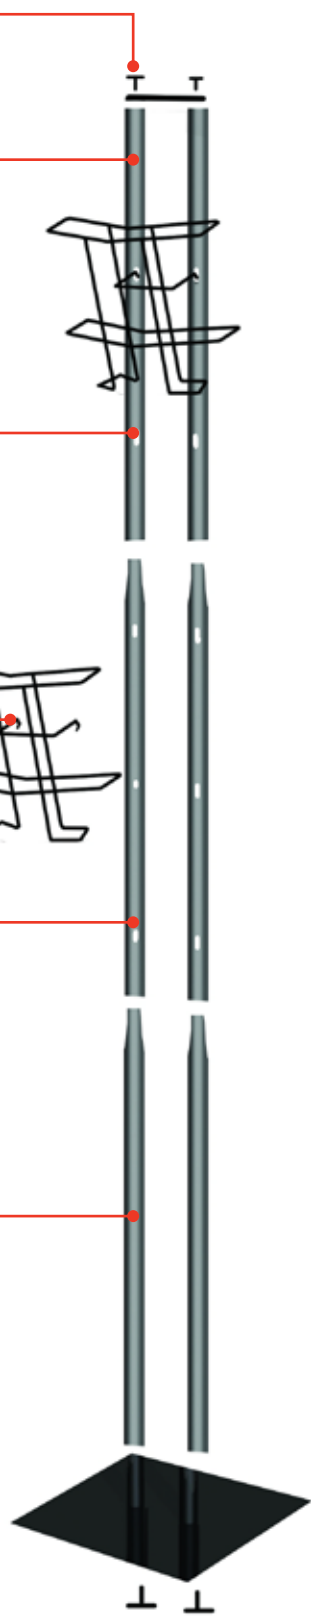

Top poles are the same diameter both ends and have female thread connectors at top ends.

IMPORTANT: Ensure all slots in upright poles face out in the same direction.

Baskets have hooks that slide into the slots on upright poles. Just hook into slot and pull down slightly to hold basket in place.

Middle poles have top side tapered and bottom end open.

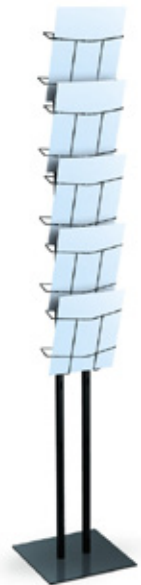

Bottom poles have top side tapered and bottom ends have female thread connectors to accept bolts through base.

- 01 Remove screws from the ends of the top and bottom upright poles
- 02 Screw bottom poles into base by using supplied bolts through base into threaded hole at the bottom ends of the poles.
- 03 Connect middle poles to the bottom poles (tapered ends facing up).
- 04 Connect top poles to middle poles (threaded female connector at top end).
- 05 Attach top support bracket by using supplied bolts through bracket into threaded female connector of top poles.
- 06 Attach wire literature baskets by aligning hooks on to slots of upright poles. Pull downward slightly to lock baskets in place.
- 07 Repeat to install either 5 or 10 baskets on to the upright poles.
- 08 Double-sided 10 basket model received 5 wire literature baskets on each side.
